PROFESSIONAL PROFILE

Dedicated and motivated Electrical Engineering student currently completing a Diploma in Electrical Engineering with a strong passion for smart systems, automation, electronics, power systems, and innovative engineering solutions. Skilled in technical problem-solving, networking fundamentals, and system troubleshooting through practical academic projects. Seeking bursary and postgraduate opportunities to further develop technical expertise and contribute meaningfully to South Africa's engineering and technology sector.

EDUCATION

Central University of Technology

Diploma in Electrical Engineering

Expected Completion: 2026

Relevant Coursework:

Electrical Machines, Power Systems, Industrial Electronics, Digital Systems, Mathematics, Communication Systems, Control Systems, Electrical Circuit Analysis, Engineering Science

TECHNICAL SKILLS

- Electrical Circuit Analysis
- Electrical Drawings & Schematics
- Fault Finding & Troubleshooting
- Basic PLC Knowledge
- Power Systems Fundamentals
- Electronics Fundamentals
- Embedded Systems Interest
- Smart Technology Concepts
- IPv4 & IPv6 Configuration
- Router Configuration & Subnetting
- Microsoft Office Suite

PROJECTS

Smart Signal & Safety System Concept

Designed and developed concepts for a smart signaling and safety-focused engineering system aimed at improving communication efficiency and emergency response functionality.

Networking & Connectivity Practical

Configured and tested networking devices involving IPv4 and IPv6 addressing, router configuration, and troubleshooting.

KEY STRENGTHS

- Strong analytical thinking
- Problem-solving ability

- Fast learner
- Team collaboration
- Good communication skills
- Innovative mindset
- Ability to work under pressure

CAREER OBJECTIVE

To become a highly skilled Electrical Engineer specializing in smart systems, automation, and innovative engineering technologies while contributing to infrastructure and technological advancement in South Africa.
